AMRITO KUNDU

Vibe Coder · Python · AI-Assisted Development

West Bengal, India | (+91) 8348435630 | amritokundu719@gmail.com
github.com/AMRITO-KUNDU | amritokundu-portfolio.vercel.app

PROFESSIONAL SUMMARY

Self-taught developer and vibe coder. Python is my primary language. I design the system, direct AI to build it in the stack that fits the job, review the code, and ship it. I have a track record of taking ideas to production: AI-powered web applications, developer tools, mobile apps, and serverless utilities, all deployed and live.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Dart, SQL, HTML5, CSS3

Frontend & Mobile: React, TanStack Start, Next.js, Flutter, Tailwind CSS

Backend & AI: Node.js, FastAPI, REST APIs, Groq API, AI Agents, rembg, Supabase, MySQL

Cloud & DevOps: Vercel, Cloudflare Workers, Render, Hugging Face Spaces, Docker, Git, GitHub

WORK EXPERIENCE

Full-Stack & AI Software Engineer — Independent Developer | Jan 2024 – Present

- Shipped and deployed 10+ full-stack web, mobile, and CLI products across serverless and edge infrastructure (Vercel, Cloudflare Workers, Render, Hugging Face Spaces).
- Build AI-powered products end to end: system design, model and API selection, frontend, backend, and deployment, using Python alongside React, TypeScript, and Dart.
- Publish and maintain open-source developer tooling on PyPI and GitHub, including llmScribe, a codebase-to-prompt exporter used by other developers.

PROJECTS

Scoop | scoop-topaz.vercel.app
AI personal assistant for school communications, event invitations, and family logistics. Silver Award winner at the CSC Back-to-School Hackathon and selected for Hackyard Build 2026 (IIT Guwahati). Built with TanStack Start, Groq API, and AI agents; deployed on Vercel.

llmScribe | pypi.org/project/llmscribe
Open-source Python tool that exports an entire codebase (directory tree plus full file contents) into one LLM-ready text file. Ships with CLI, GUI, and interactive terminal interfaces; published on PyPI.

BG Remover | image-background-remover-lake.vercel.app
AI image background remover with a model marketplace (U2-Net, ISNet, BiRefNet), remove.bg API integration, and alpha-matting for fine hair and fur edges. Built with React, FastAPI, and rembg; backend deployed on Hugging Face Spaces.

Vidgrab 2.0 | video-downloader-1gn1.onrender.com
Standalone AI video search and downloader web application built with React, Tailwind CSS, Vite, Node.js, and yt-dlp; deployed on Render.

walliq | walliq.amritokundu719.workers.dev
Wallpaper app with light and dark theming, favorites, and category filtering, built as both a web app and a full Flutter rewrite, backed by a lightweight GitHub-powered CDN.

NewsReels | news-reels-smoky.vercel.app
Indian news app built around an endless, TikTok-style vertical-scroll experience, aggregating live RSS feeds across categories. Built with React and TypeScript.

ACHIEVEMENTS

CSC Back-to-School Hackathon — Silver Award (2nd Place) | Oct 2026
Won the Silver Award for Scoop, an AI-powered personal assistant for school communications and family logistics. Awarded by Webb Computer Science for Change.

Hackyard Build 2026 — Selected Builder | Oct 2026
Selected for the Hackyard Build 2026 in-person round at IIT Guwahati with project Scoop, from thousands of applicants.

Replit 10th Birthday — Top 8% of Builders | May 2026
Ranked in the top 8% of all builders; shipped 2 apps in a single day with 64 AI agent interactions. Recognized as a Manager of Parallel Agent.

CERTIFICATIONS

Google: Introduction to Image Generation; Introduction to Large Language Models

HP LIFE: AI for Business Professionals; Critical Thinking in the AI Era; Data Science & Analytics

OpenAI Academy: AI Foundations; Applied AI Foundations
