PROFESSIONAL SUMMARY

Self-taught Full-Stack & AI Software Engineer experienced in building high-performance web applications, serverless APIs, and AI context automation utilities. Proven track record of shipping production tools using Python, React, TypeScript, and FastAPI with a focus on latency reduction, UI optimization, and backend efficiency.

TECHNICAL SKILLS

Languages:	Python, TypeScript, JavaScript, SQL, HTML5, CSS3
Frontend & Mobile:	React, Next.js, Flutter, Tailwind CSS
Backend & AI Tools:	Node.js, Express, FastAPI, REST APIs, rembg, Supabase, MySQL
Cloud & Platforms:	Cloudflare Workers, Docker, Vercel, Render, Git, GitHub, VS Code

EXPERIENCE

Full Stack & AI Software Engineer | Independent Developer

Jan 2024 – Present

- Architected and deployed 5+ full-stack web and CLI applications served globally via serverless edge infrastructure.
- Engineered custom concurrency-limited fetch layers with exponential backoff, handling 100+ parallel requests with zero dropouts.
- Containerized AI segmentation models with Docker and FastAPI, reducing background removal latency by 35% (down to under 1.2s per image).

PROJECTS

Soros Alpha

soros-alpha.vercel.app

- Developed a real-time financial market dashboard handling live data streaming across 20+ market assets using React and Supabase.
- Implemented custom rate-limiting wrappers with jitter, preventing API throttles and maintaining 99.9% uptime during high-volume spikes.

BG Remover

image-background-remover-cjlu.onrender.com

- Built an AI image background removal suite with dynamic model switching (U2-Net, ISNet, BiRefNet), achieving 98%+ precision on complex edges.
- Optimized image processing workflows with alpha-matting, cutting user wait times by 30% and deploying containerized backends on Render.

DirScribe (11mScribe)

dirscribe.vercel.app

- Created a CLI and GUI context utility in Python that compresses multi-file directory codebases into single-file prompts, reducing LLM context overhead by up to 40%.

Walliq

walliq.amritokundu719.workers.dev

- Designed a Flutter wallpaper app backed by GitHub CDN, achieving sub-200ms image load times and caching 100+ high-res assets locally.

NewsReels

news-reels-smoky.vercel.app

- Engineered an endless vertical-scroll news application aggregating 15+ live RSS feeds with dynamic categorization and 50% faster client-side re-renders.

CERTIFICATIONS

- **Technical & AI Credentials:** Microsoft, IBM, Google, Cisco, OpenAI, Anthropic, Kaggle, HP LIFE, TCS iON, Infosys Springboard, Elements of AI (University of Helsinki).
